## JOB OBJECTIVE

---

To obtain a Data Engineer Internship and aim to apply my analytical and programming skills in a real-world setting. Eager to gain valuable hands-on experience in data processing and management.

## SKILLS

---

**Programming** Python, Java(OOP), C++, Golang, Javascript, Typescript, HTML and CSS

**Data** PostgreSQL, Redshift, MongoDB, DynamoDB, MS Excel

**Statistics/ML** Pytorch, Scikit-learn, Pandas, Matplotlib, Scipy

**Design** Figma, Canva

**Language** English - Intermediate

## WORK EXPERIENCE

---

### Backend Developer, Part-time

Aug 2023 - Present

📍 Vonder, Thailand

- Collaborate with team to develop a service product based on specific requirements.

### Backend Developer, Internship

Jun - July 2023

📍 Vonder, Thailand

- Acquired skills to implement APIs and execute queries to meet requirements.

### Teacher Assistant of Programing Methodology

Feb 2023 - Present

📍 Computer Engineering, Chulalongkorn University

- Associated with OOP and GUI Design using JAVA
- Designed and checked Lab assignment and exam and assisted teacher in the Lab activity.

## PROJECTS

---

### Transcript retrieval

Aug 2023 - Present

Computer Engineering, Chulalongkorn University

A Natural Language Processing for Semantic Search

- Observed and learned concepts of NLP and Semantic Search from a senior capstone project
- Acquired foundational knowledge in basic Machine Learning (ML).

### Microbiome data platform

Feb - May 2023

Computer Engineering, Chulalongkorn University

A web application for microbiome data with visualization and dashboard.

- Responsible for Back-end and API Using Golang and Database using MongoDB

### Garden Escape Game

Nov - Dec 2022

Computer Engineering, Chulalongkorn University

A simple 2D Role-playing game (RPG) which is a final project for Programing Methodology

- using JAVA (OOP) and design GUI with JavaFX and CSS

## EDUCATION HISTORY

---

### Chulalongkorn University

2021 - Present

📍 Bachelor Of Computer Engineering, Faculty of Engineering

GPA 3.34
